

DELAWARE SOLID WASTE AUTHORITY

JOB DESCRIPTION

JANUARY 1, 2014

TITLE: ENGINEER III

REPORTS TO: MANAGER OF ENGINEERING
FACILITY MANAGER

JOB CLASS: EXEMPT

LOCATION: STATEWIDE

PURPOSE:

This position provides a DSWA staff member who is responsible for implementation of DSWA projects and who has supervisory responsibility for other DSWA employees. Work assignments will require intensive and diversified knowledge of engineering principles and practices in the field of solid waste management. Assignments will allow development of professional capabilities through applications of comprehensive and complex techniques, procedures, and criteria in performing sequences of related engineering tasks. The position must exercise judgment on details of work and in making final selections and adaptations of engineering alternatives. This position may oversee that work of engineers and may be required to directly supervise environmental scientists, technicians, weighmasters or collection station attendants.

JOB DUTIES:

- * Manages and directs specific studies and research projects.
- * Coordinates efforts with others at local, state and federal agencies and industries.
- * Supervises environmental technicians.
- * Works with and speaks before groups and organizations.
- * Plans and organizes projects and budgets.
- * Conducts site visits
- * Assists in negotiation of contracts.

Engineer III
Job Description
Page 2

- * Responsible for collecting, interpreting, and disseminating technical information
 - * Responsible for the preparation and review of engineering drawings and specifications and permit documents.
 - * Administers and oversees contractors' compliance with regard to contract requirements.
- Prepares technical reports.
- Assists in long-range planning and recommends policies and goals.
- Performs other duties as assigned.

QUALIFICATIONS:

Graduation from an accredited college or university with a bachelor's degree in civil, environmental, mechanical chemical or related engineering and a minimum ten (10) years of progressively responsible professional experience in the environmental field, including solid waste, air and/or water pollution control with two years of supervisory experience preferred. Possession of a valid driver's license.

Possession of a Delaware Professional Engineer's License.

- * Denotes essential functions of the job.

Note: This may be considered a safety sensitive position and require drug testing as a condition of employment.
